

# WAVESHAPER / PLASTICID KIT MKII

> The **Boss DR-110** is a cute little drum machine from the early 80s, the last analogue one made by Roland. The overall sound is very reminiscent to the much praised Tr-808 and Tr-606. The kick is punchier than the 606, but the hats and cymbals will provide you that instant acid factor and the snare is also very snappy. The clap is similar to the 808's one, so you're right by thinking that the DR-110 will give you that classic, sought-after sound but with some slight difference and much character. If you are into electro/house/acid/retro/techno music, you will like this one for sure !

As the Dr-110 has few sounds (but all are killer !), i made two kits out of it : one rather clean, and another one pushing the tubes of the preamp and the compressor in the red, so you get a bit more dirt and warmth. You can use them as two separate kits, or if your sampler of choice allows for velocity layering, you can easily spice up your tunes with pleasant saturation effect.

> **Plasticid MkII** takes the critically-acclaimed **Plasticid** drumsample pack one step further, with *120 new samples gathered in 15 kits*. This new version aims at coloration and expands the sonic palette of the venerable Boss DR-110, processing it using vintage hardware to shape it up nicely. The cymbals are spitting, the bassdrum is kicking, and the snare and claps tones range from dark to bright, so each kit is like a rebirth for the mighty dr-110 ! Great care has also been taken about recording manually a semi-open hat sample for even more expression.

> As always with WaveShaper sample packs, you can decide to use the **free** kit or buy the "pro" one : The "pro" pack uses 24bit/48khz, stereo Wav files, and cost 1,40\$. The **free** pack is made out of standard 44,1khz-16bit mono Wav files.

The **MkII** kit costs 3.40\$, the "classic" kit is still available (and costs 1.40\$). Existing customers can upgrade to MkII version for free.
