

# WAVESHAPER / THE BRAIN 306

## > fat analog drumsynth sound

Made popular by disco and cold wave bands, the electronic drumsynths shaped the sound of a decade. But thanks to its CLAP and SYNTH modules, the Techstar 306 drum brain has a far wider sonic range than the classic « *lazer tom* » sound from the eighties : deep kicks, punchy snares, raw analogue claps, sound FX, synthetic toms, and noise-driven hi hats are all here.

The **Brain 306** drumsample pack by WaveShaper will give you that fat analog drumsynth sound ! It features clean, straight samples, as well as more «colored» sounds (processed using vintage mixers, tube compressors, analog eqs), and also a «production-ready» bonus folder.

This brand new pack works very well with electro, old school hiphop, house & minimal techno, dubstep, reggae and, of course, disco music.

> As always with WaveShaper packs, you can decide to use the free kit or buy the “pro” one :

- The **Total Cortex** pack packs more than **490** one-shot samples recorded with care with many variations. All samples are in WAV, 24bit 48khz stereo format. It costs only \$5,90.
- The **Right Brain** pack features a selection of **195** samples from the *Total Cortex* pack. It costs only \$3,90.
- The **free** pack contains 33 one-shot sounds in 16bit, 44,1khz mono.

> If you like this pack, please visit [waveshaper.org](http://waveshaper.org) for more samples, and to get informed about what's coming soon.
